AN217 Version: 1

Animal Behaviour & Handling

Calendar Description

This course covers the normal development of behavior and how animals learn new behaviors. Recognition of different breeds of animals and their differing characteristics is also discussed. As well, the content covers the correct restraint methods that should be used when working with both small and large animals.

Rationale

This is a required course in the Animal Assisted Wellness certificate program. It is important to understand the normal behavior of the animal species that students are going to be working with. How animals continue to learn new behaviors is also essential when working with an animal that is going to be interacting with people in different environments. It is also important for students to know how to safely and properly restrain animals of all types in different situations. Understanding the differences between the breeds of different species ensures they are handled appropriately.

Prerequisites

None

Co-Requisites

None

Course Learning Outcomes

Upon successful completion of this course, students will be able to

1. recognize the common breeds for dogs, cats, horses and rabbits.
2. describe and recognize normal behavioral patterns in the dog and cat.
3. explain and identify normal behavior patterns in the horse and rabbit.
4. discuss the common behavioral problems which may develop in dogs, rabbits, cats and horses.
5. explain the theory of how animals learn.
6. explain correct methods of restraint in the dog, cat, rabbit, sheep and horse.

7. explain the body language of horses and how methods of handling differ from small animals.

Resource Materials

Required Textbook(s):

None

Reference Textbook(s):

None

Conduct of Course

This course consists of 42 hours of lecture. This course includes online lectures and videos, discussions via discussion boards, and PowerPoint presentations to provide an understanding of animal behaviour and handling. Self-study using referenced texts and articles is recommended. Examination of materials is also a component of the course, and may take the place of online quizzes, or require invigilation from an outside source such as a public school or public library.

Evaluation Procedures

Assignments	15%
Discussion Boards	10%
Quizzes	10%
Midterms (2)	30%
Final Lecture Exam	35%

Lakeland College is committed to the highest academic standards. Students are expected to be familiar with Lakeland College policies related to academic conduct and academic honesty and to abide by these policies. Violations of these policies are considered to be serious and may result in suspension or expulsion from the College.

Grade Equivalents and Course Pass Requirements

A minimum grade of D (50%) (1.00) is required to pass this course.

Letter	F	D	D+	C-	C	C+	B-	B	B+	A-	A	A+
Percent Range	0-49	50-52	53-56	57-59	60-64	65-69	70-74	75-79	80-84	85-89	90-94	95-100
Points	0.00	1.00	1.30	1.70	2.00	2.30	2.70	3.00	3.30	3.70	4.00	4.00

Students must maintain a cumulative grade of C (GPA - Grade Point Average of 2.00) in order to qualify to graduate.

Attendance

Because this course is on-line, attendance is demonstrated by keeping up with readings and assignments, participation in dialogue on the discussion board and completing course work and assignments to the satisfaction of the instructor.

In cases where illness impedes participation, the student may be requested to submit a medical certificate.

Course Units/Topics

1. How Animals Learn and Associated Problems with Dogs and Cats
2. Canine Behaviour and Development
3. Rabbit Behaviour and Behavioural Problems
4. Equine Behaviour
5. Restraint for Dogs and Cats
6. Restraint for Horses
7. Evolution of Dog and Cat Breeds
8. Rabbit breeds
9. Equine breeds
