SA120 Version: 2

Safety Training

Calendar Description

This course prepares workers to recognize safety hazards, to avoid dangerous actions and to perform basic rescue when needed. The course includes a variety of safety modules but not limited to: WHMIS, H2S Alive, CPR and First Aide, Confined Space Entry, Defensive Driving, Transport of Dangerous Goods, Construction Safety Training System. Modules are chosen based upon the needs of the individual class. Each module includes a combination of both theory and practice. Upon successful completion of written and practical examinations, the candidate is issued a certificate. All modules are delivered by accredited in-house staff or by contracted outside agencies. P/F.

Rationale

This is a required course in the Pre-employment Electrical, the Pre-employment Instrument Technician, the Pre-employment Welding, the Pre-employment Automotive Service/Heavy Equipment Technician, the Pre-employment Carpenter, and the Pre-employment Steamfitter-Pipefitter programs.

Prerequisites

None

Co-Requisites

None

Course Learning Outcomes

Upon successful completion of this course, students will be able to

1. recognize and describe how to avoid various workplace safety hazards.
2. demonstrate the skills needed to provide intervention for life-threatening emergencies until medical aid arrives.
3. describe the need for safe work practices and safe job procedures.

Resource Materials

Required Text(s):

Manuals will be provided based upon the safety module being taught.

Conduct of Course

This is a lecture/lab course. Theory concepts are covered in a lecture/class discussion format, supplemented with a variety of audio visual aids. The lab portion develops the emergency response skills through the use of demonstration and practice (in groups and/or individually). Learning is instructor-paced. Video is used to replicate typical field situations. Manuals generally contain self-study questions and answers.

Evaluation Procedures

Students write a theory exam and demonstrate competence in each module in emergency response actions and the use of equipment. Students successfully completing the course receive the applicable certificate.

Grade Equivalents and Course Pass Requirements

This course is graded Pass/Fail.

Attendance

Attendance is kept at each session, and 90% attendance is required to pass this course.

Course Units/Topics

Depending on the needs of the individual class, safety modules are provided from the following list:

- Workplace Hazardous Materials Information System
- CPR / First Aide
- H₂S Alive
- Construction Safety Training System
- Fall Arrest
